Our school building project, funded by the Federal Government’s Building the Education Revolution program is due to commence on Tuesday, 31 August. The works will be completed in three stages over the next twelve months:

- Stage 1 – Construction of the new library and performing arts classroom.
- Stage 2 – Redevelopment of the existing library to form 3 permanent classrooms.
- Stage 3 – Development of the outdoor learning space and landscaping.

The following plans and arrangements have been put in place to ensure student and public safety throughout the building program. Every effort has been taken to avoid any unnecessary inconvenience to families, students and staff. Please assist by being familiar with these plans and complying with these arrangements.

**Construction Zone**
Please consult the map of the school ground on the reverse of this notice for the construction zone for stage 1 of the building program.

**Access to school grounds from Florence Street**
- Gates at northern end of school ground on Florence Street – driveway and pedestrian gates – will be unavailable for access until further notice.
- The walkway that runs north/south between the oval area and the chain walk equipment will be unavailable.
- Families and students wishing to enter the school grounds from the western side are asked to enter via the pedestrian gate at the southern end of the school ground, at the rear of the kindergarten.
- Families and students who usually enter the school grounds by the northern gate in Florence Road should:
  I. Walk along the footpath on the west side of Florence Street / Gladstone Street to the corner of Montague Street and cross Gladstone Street to enter by the southern gate. Staff will supervise this area from 8.45am each morning.
  II. Walk around to the front of the school via Kerferd Road and Glen Iris Road.

**Play Ground areas:**
As the Grade 3 and 4 play equipment will be out of bounds for the period of Stage 1 development, Grade 3 and 4 students will be allowed to use the Grade 5 and 6 equipment at the end of the oval. Staff will closely monitor and supervise this area for safety and over-crowding. Alternative arrangements will be made, if necessary.

**Parking and Neighbourhood courtesy**
Our building project not only affects us, it also has an impact on our neighbours. The building will inevitably bring trucks and heavy machinery into the streets surrounding the school. This additional traffic flow will increase noise levels at times. Please ensure you park in accordance with parking regulations. If possible, avoid Florence St, Gladstone St and Montague St as these areas will become very congested. This will assist us to provide a safe entry to school for the children.

Yours Sincerely

Meredith Carracher
